JAVASCRIPT ASSIGNMENT : 05

Module 5: Loops – Multiple Assignment Questions

Section 1: for Loop Based Questions

1. Print numbers from 1 to 100

Write program to print numbers from 1 to 100 using for loop.
Hint: Initialize counter and increment properly.

---

2. Print even numbers between 1 to 50

Write program that prints only even numbers.
Hint: Use modulus operator inside loop.

---

3. Calculate sum of first n natural numbers

Take number n and calculate sum from 1 to n.
Hint: Use accumulator variable.

---

4. Print multiplication table of given number

Take number input and print its multiplication table.
Hint: Loop from 1 to 10.

---

5. Reverse a number using loop

Take number and reverse its digits.
Hint: Use modulus and division.

Section 2: while Loop Based Questions

6. Print numbers until condition becomes false

Write program using while loop to print numbers from 1 to 20.
Hint: Initialize counter before loop.

7. Count digits in a number

Take number input and count how many digits it has.
Hint: Divide number repeatedly.

8. Check palindrome number

Take number and check if it reads same forward and backward.
Hint: Reverse number and compare.

9. Calculate factorial of number

Take number and calculate factorial using while loop.
Hint: Multiply numbers in loop.

Section 3: do while Loop Based Questions

10. Print menu until user exits

Create simple menu driven program which runs at least once and stops when user selects exit option.
Hint: Use do while for guaranteed execution.

11. Create guessing number game

Generate random number and allow user to guess until correct.
Hint: Use loop until condition matches.

Section 4: break and continue Based Questions

12. Print numbers but stop at 50

Write loop that prints numbers from 1 to 100 but stops when number reaches 50.
Hint: Use break.

13. Skip multiples of 5

Print numbers from 1 to 50 but skip multiples of 5.
Hint: Use continue.

---

14. Find first number divisible by 7

Write loop that finds first number between 1 to 100 divisible by 7 and stops execution.
Hint: Use break.

Section 5: Nested Loop Questions

15. Print simple star pattern

Print square star pattern using nested loops.
Hint: Outer loop for rows and inner for columns.

---

16. Print right triangle pattern

Print increasing star pattern.
Hint: Inner loop depends on outer loop counter.

---

17. Print pyramid pattern

Create pyramid star pattern.
Hint: Combine spaces and stars using nested loops.

---

18. Print multiplication table from 1 to 10

Print tables of numbers 1 to 10 using nested loops.
Hint: Outer loop for number and inner loop for multiplier.

---

19. Create matrix style number pattern

Print numbers in matrix form like 3 by 3 grid.
Hint: Two nested loops with row and column.

---

20. Find prime numbers between 1 to 100

Write program to print all prime numbers between 1 to 100.
Hint: Use nested loop for checking divisibility.

Section 6: Interview Level Logical Questions

21. Reverse string using loop

Take string and reverse it manually without built in method.
Hint: Loop from end to start.

---

22. Count vowels in string

Take string and count number of vowels.
Hint: Loop through each character.

---

23. Find largest number in array using loop

Take array and find largest element manually.
Hint: Use comparison inside loop.

---

24. Remove duplicate elements from array using loop

Create logic to remove duplicates manually.
Hint: Use nested loop or temporary array.

---

25. Generate Fibonacci series

Print Fibonacci series up to n terms.
Hint: Use previous two number logic.

Additional Loops – Assignment Questions

---

1. for in Loop Based Questions

(for in mainly objects sathi vapartat)

---

1. Print all object properties using for in

Create object storing student details and print all keys and values using for in loop.
Hint: Loop iterates over object keys.

---

2. Count number of properties in object

Create object and count how many properties it contains.
Hint: Use counter inside for in loop.

---

3. Print only keys of object

Create object and print only property names without values.
Hint: Loop gives property names.

---

4. Modify object values using for in

Create object and increase all numeric values by 10.
Hint: Access value using object key inside loop.

---

5. Check if property exists in object

Create program to check whether specific property exists inside object.
Hint: Compare key inside for in loop.

---

2. for of Loop Based Questions

(for of arrays and iterable objects sathi)

---

6. Print all elements of array using for of

Create array of numbers and print each element using for of.
Hint: for of gives direct values.

---

7. Calculate sum of array elements

Create array and calculate total sum using for of.
Hint: Use accumulator variable.

---

8. Count vowels in string using for of

Take string and count vowels using for of loop.
Hint: for of iterates character by character.

---

9. Find largest number in array using for of

Take array and find largest element.
Hint: Compare each value inside loop.

---

10. Convert array elements to uppercase

Create array of strings and convert each element to uppercase.
Hint: Store result in new array.

---

3. forEach Loop Based Questions

(forEach array method aahe)

---

11. Print array elements using forEach

Create array and print each element using forEach.
Hint: Pass callback function.

---

12. Multiply each array element by 2

Create array and multiply each element by 2 using forEach.
Hint: Modify array or create new one.

---

13. Print index and value using forEach

Create array and print index and value both.
Hint: forEach gives element and index.

---

14. Calculate sum using forEach

Create array and calculate sum of elements.
Hint: Use external accumulator variable.

---

15. Filter even numbers using forEach

Create array and store only even numbers in new array using forEach.
Hint: Use condition inside callback.
